

RelyOn Nutec hosted round-table discussions on offshore wind and Power-to-X during the royal Danish visit to the Netherlands

RelyOn Nutec with CEO, Torben Haring, participated in the royal visit to the Netherlands fronted by The Danish Crown Prince Couple, including government ministers, inter-branch organisations and a delegation of Danish companies.

On the 2nd day, RelyOn Nutec hosted the delegation and two round-table discussions on offshore wind energy and Power-to-X.

CEO, Torben Haring says: “It was a great honour to welcome HRH Crown Prince of Denmark and a true privilege to host Dutch and Danish organisations and companies who are playing an important role in the transition to renewable energy”.

RelyOn Nutec is the largest training provider to the offshore wind sector generally, but at this occasion we took the opportunity to demonstrate the different characteristics of hydrogen gases, traditional natural gases, liquified natural gases, particularly focused on explosive and fire risk characteristics.
