

RelyOn Nutec Acquires Electrical Training and Consultancy Specialist Quercus Technical Services, Fast-Tracking European Electrical Capability Build

Effective May 21st, RelyOn Nutec has acquired Quercus Technical Services BV, one of the largest specialist electrical safety and skills training organizations in the Netherlands. The acquisition of Quercus bolsters RelyOn Nutec's position in the electrical training market and accelerates its European roll out.

Quercus is recognized for its comprehensive training, inspection and consultancy services for the electrical supply industry. With four established facilities across the Netherlands, Quercus has built a solid industry reputation over its more than 30 years of operation. The company's team of expert trainers, coupled with state-of-the-art equipment, positions it as a leader in the field.

RelyOn Nutec has established itself as a leading international, multi-service safety, skills and competence house with fully integrated digital services. The strategic rationale behind the acquisition aligns with the company's commitment to support the global energy transition and, as part of that, build a global electrical training and consultancy service.

"RelyOn Nutec is committed to forging a resilient global electrical training and consulting service. This acquisition, our second within the electrical sector, only two months after the full acquisition of Thomson Bridge, demonstrates our commitment to become the future leader in electrical training and competence services across our global footprint," commented Torben Haring, CEO at RelyOn Nutec.

Joining forces with Quercus accelerates RelyOn Nutec's European capability build, with the ambition to deliver electrical training and consultancy services to existing and new customers throughout its footprint.

"RelyOn Nutec has transitioned itself immensely and its management has the same high business ethics as we have in Quercus. Therefore, we are looking very much forward to becoming part of the RelyOn Nutec Group," said Paul Koop, Managing Director and founder of Quercus.

The acquisition of Quercus represents a milestone in RelyOn Nutec's transformation strategy. By integrating Quercus's operations and expertise into its existing framework, RelyOn Nutec is poised to deliver enhanced value to its clients and capitalize on emerging market opportunities.

"We are delighted to welcome the Quercus team to our growing electrical training capability. Quercus brings 30 years of electrical training knowledge and have a solid understanding of skills and safety training requirements for the modern electricity supply industry," added Lisa Parkinson, Managing Director Electrical Services at RelyOn Nutec.

Paul Koop will continue as Managing Director for Quercus.
