## **RelyOn Nutec to acquire an interest in Thomson Bridge**

RelyOn Nutec expands into High Voltage (HV) electrical training and consultancy to further strengthen its world leading position within renewable energy training services by acquiring an interest in Thomson Bridge (TB). TB is Australia's leading provider of electrical skills and safety training for the Electricity Supply Industry (ESI). This initiative assembles a team of Safety, Electrical and Education practitioners that will operate internationally for our clients who build, own and operate critical infrastructure for the Energy Transition. Furthermore, the acquisition gives RelyOn Nutec a footprint in the attractive Australian market.

Torben Haring, CEO RelyOn Nutec said "This transaction is an excellent fit for us as part of our strategy to introduce HV electrical training and consultancy across global markets. Thomson Bridge provides an entry into Australia's renewable generation industry, and the broader ESI, during this pivotal time of energy transition, and, utilising the RelyOn Nutec footprint, we will expand Thomson Bridge's electrical services to the rest of the world".

Lisa Parkinson, MD Thomson Bridge added "We are delighted to be partnering with an organisation that has a similar commercial ethos and modern approach to education, using the best technologies and experience around the world. The combined business will be very well positioned to capitalise on the current and future market trends and to continue to accelerate growth. This will allow us to provide a wider portfolio of services using RelyOn Nutec's platforms and will introduce our electrical training to its global markets."

RelyOn Nutec's CEO Torben Haring and Paul Robins, Director of Renewable Energy, who recently joined RelyOn Nutec from Vestas, will be joining the Thomson Bridge board. The Thomson Bridge board already includes solid commercial experience with Managing Director Lisa Parkinson; Chairman Greg Embleton, a board member of companies transitioning to Europe, who has strong technical, commercial, growth, transformation experience; and Stuart Hansford with experience in learning and development in mining, aviation and energy sectors.

### **About RelyOn Nutec**

RelyOn Nutec delivers safety, compliance and competence services and solutions across the world. Through 30+ facilities, RelyOn Nutec helps clients protect their people, assets and the environment. RelyOn Nutec has a deep history going back over 50 years and leads, through the intelligent application of the latest technology, the energy sector as well as other safety critical industries.

RelyOn Nutec is leading the safety and technical training field and has a broad range of innovative digital services, including digital learning, adaptive learning, simulation
